It's Home Inspection Time!

During the next few months, the Housing Department will be doing their Semi-Annual Unit Condition Inspections. The purpose of a home inspection is to determine what item(s) need to be repaired or replaced. We have already found such items as toilets leaking, sinks clogged, hand railings that are not secure, appliances that are not working or missing parts, broken windows, missing window screens etc.

Our goal is to repair and / or replace these items so that you will be safe in your home and enjoy your home.

Along with the Semi-Annual Unit Condition Inspections, all rental homes are also scheduled to have the furnace filters changed, gutters cleaned, smoke detectors changed, and fire extinguishers changed. There are several homes that qualified for the BC Hydro Indigenous Communities Conservation Program and those homes will also have home energy products installed.

Please be patient with us as this will take time and more than one trip to your home.

If you have any questions, please don't hesitate to reach out to the Housing Department.
